

Highways Agency Performance Indicator: Above the waterline

Dean Kerwick-Chrisp
Safety, Standards and Research
Appraisal Group: Environmental Policy

Strategic Road Network

- 9,380 km (5,863 miles) motorway and trunk road

- Value £65 bn single largest Government asset
- Carrying 1/3 of all traffic and 2/3 of all freight

Types of Project

- Targeted Programme of Improvements (TPI) major improvements > £5M
- Making Better Use (MBU) smaller schemes
 - Local Network Management Schemes (LNMS)
 - Network Operator (Technology)
 - Research
- Maintenance

Environmental Performance Indicators

- Highways Agency's environmental performance indicators first introduced for 2000-01 business plan.
- Indicator: The % achievement of the average annual target based on the environmental programme.
- The target for 2000/01: To achieve an average annual target of 85% across the four environment programme sub-indicators.

Environmental Performance Indicators

- - **Noise**, where we aim to treat at least 10 sites from the list published in Hansard on 11 November 1999, and to spend the full £5m budget on cost effective schemes
- - **Air quality**, where we aim to respond to 95% of consultations on local air quality plans in accordance with local authority review and assessment programme timescales
- - **Biodiversity**, where we aim to have 10% by length of the network under active bio-diversity management by 31 March 2001
- - **Landscape**, where we aim to have 25% by length of the network under active landscape management by 31 March 2001.

Environmental Performance Indicators (Output)

- *Average achievement, at least 95%,
across the following five sub-indicators:*

Environmental Performance Indicators (Output)

- *Improve air quality of at least 4 sites in Air Quality Management Areas*
- *Achieve at least 12% of Biodiversity Action Plan, extending across 15 targets*
- *Introduce no less than 8 planting schemes to enhance the landscape*
- *Treat at least 300 lane kms of concrete road surface with lower noise surfacing*
- *Treat at least 2 pollution risk water outfall sites.*

Proposed Future Development

- Performance in the delivery of targeted interventions (outputs)
- Programme wide analysis of expected delivery against the environmental appraisal sub-objectives (outcomes)
- Network wide analysis of the Agency's highway estate

Delivery against Environmental Appraisal

The UK Government's five objectives for transport are:

- to protect and enhance the built and natural environment;
- to improve safety for all travellers;
- to contribute to an efficient economy;
- to promote accessibility; and,
- to promote the integration of all forms of transport and land use planning

Delivery against Environmental Appraisal sub-objectives

- to reduce noise,
- to improve local air quality
- to reduce greenhouse gases
- to protect and enhance the landscape
- to protect and enhance the townscape
- to protect the heritage of historic resources
- to support biodiversity
- to protect the water environment
- to encourage physical fitness
- to improve journey ambience

Delivery against Environmental Appraisal

- Qualitative (descriptions of significant issues on a given scheme)
- Quantative (numerical values of the impact)
- Assessment Score (a quantified value where numbers exist or a textural descriptive score)

Delivery against Environmental Appraisal

- Overall forecast performance by distribution of scores (quantity and significance) – the balance;
- Range of scores and potential for target setting;
- Trend over time – acceptance, open and transparent.
